PROFESSIONAL SUMMARY

Detail-oriented Front End Developer with experience building and maintaining production web and mobile applications. Specialized in React, modern JavaScript (ES6+), and responsive UI architecture. Adept at integrating RESTful APIs, dropping into existing codebases, and writing clean, maintainable code. Focused on delivering reliable, accessible, and high-performance solutions in structured, process-driven environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React (Functional Components & Hooks), React Native, Vue 3

Architecture & UI: Responsive Design, Flexbox, CSS Grid, Component-Based Architecture, DOM Manipulation

Tools & Integration: Git, REST APIs, JSON Data Handling, WebSockets, npm, Vite, Webpack

Concepts: Async/Await, State Management, Cross-Browser Compatibility, Debugging, Code Reviews

ENGINEERING EXPERIENCE

Front End Developer | *LasuLearn — Production E-Learning Platform*

- ▶ Collaborated with a development team to build and maintain a production e-learning web application serving active student users.
- ▶ Engineered and shipped the platform's companion mobile application, ensuring cross-platform feature parity and a consistent user experience.
- ▶ Integrated RESTful APIs to handle dynamic course data, user authentication, and secure JSON data management.
- ▶ Participated in a structured development process using Git for version control, branch management, and collaborative code reviews within a private organizational repository.
- ▶ Implemented responsive layouts and semantic HTML5 to ensure accessibility and cross-browser compatibility.

Front End Developer | *Regexium*

- ▶ Developed a real-time regular expression tester and syntax highlighter from scratch using Vue 3 and TypeScript.
- ▶ Engineered complex DOM manipulation and deep UI state management to handle live, asynchronous text parsing without performance degradation.
- ▶ Designed a clean, maintainable component architecture prioritizing strict type-checking and robust error handling.

Software Engineer | *Kablux — Ride-Sharing Application*

- ▶ Architected the front-end interface for a ride-sharing application requiring complex, real-time data handling.
- ▶ Integrated WebSockets for live location tracking, managing asynchronous data streams between rider and driver interfaces.
- ▶ Utilized browser developer tools to aggressively debug state synchronization issues and ensure seamless live updates.
- ▶ Built lean, modular UI components from scratch, keeping bundle sizes small and load times fast.

Software Engineer | *Hustla — Service Marketplace*

- ▶ Developed a service marketplace application with complex user onboarding flows and role-based interface rendering.
- ▶ Implemented sophisticated state management using modern React hooks (useState, useEffect) to manage user profiles and service requests.
- ▶ Designed responsive layouts using Flexbox and CSS Grid, ensuring a flawless experience across mobile and desktop viewports.

EDUCATION

Bachelor of Science, Computer Science

University of Uyo • Uyo, Akwa Ibom, Nigeria

Expected Graduation: 2027
